

COURSE CODE : CSA1304

COURSE NAME : THEORY OF COMPUTATION

Shaik Mohammed Waseem Rayan

192373004

Lab Exercise

31. Design PDA using simulator to accept the input string anbn

32. Design TM using simulator to perform string comparison where $w=\{aba \text{ } aba\}$

33. Design DFA using simulator to accept the string having 'abc' as substring over the set $\{a,b,c\}$

34. Design DFA using simulator to accept even number of c's over the set {a,b,c}

35. Design DFA using simulator to accept strings in which a's always appear tripled over input {a,b}

36. Design NFA using simulator to accept the string the start with a and end with b over set {a,b} and check W= abaab is accepted or not.

37. Design NFA using simulator to accept the string that start and end with different symbols over the input {a,b}.

38. Design NFA using simulator to accept the input string "bbc" ,"c",and "bcaaa".

39. Design DFA using simulator to accept the string the end with abc over set {a,b,c} W= abbaababc

40. Design NFA to accept any number of b's where input={a,b}.
